series

Product Segments

• Care Motion

The TL51 column from TiMOTION is designed for any height-adjustable medical application, such as exam chairs, treatment/procedure tables, and applications in healthcare or industrial environments requiring the use of a high load lifting column. The TL51 provides multiple cable exit options, such as from top end socket or top/bottom sides. With its 3-stage telescopic design, the TL51 lifting column offers a high degree of stability.

Note

- 1 Please refer to the approved drawing for the final authentic value.
- 2 The current & speed in table are tested with 24V DC motor.
- 3 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.
- 4 Bending moment Y direction = X*1
- 5 Static bending moment = dynamic*2
