

# TEK arrc

## Slimmer, Neater, Modular Solution for Office.

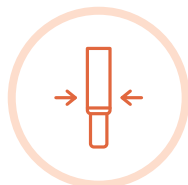

Introducing the TEKarrc, a height-adjustable desk that combines sleek design with modular functionality. The TEKarrc can be configured with either four or six legs, providing flexibility for different workspace needs. Its slim profile is both modern and sophisticated, making it a stylish addition to any office or home environment.

One of the standout features of the TEKarrc is its clean cable management. All wiring is concealed within the frame, ensuring a tidy and clutter-free workspace. This not only enhances the desk's minimalist design but also contributes to a more organized and efficient work area.
